# Yashasri Cherukuri

US Citizen - Atlanta, GA - www.linkedin.com/in/yashasri-cherukuri - yashicherukuri@outlook.com

**(Portfolio currently being updated. Please email me for Portfolio)**

**Creative and detail-oriented Industrial & UX Designer with experience designing intuitive digital and physical products.**

## Education

**Savannah College Of Art and Design (SCAD) — BFA in Industrial Design / Minor in UX/UI Design** **Expected Graduation: May 2027**

## Work Experience

**Delta Air Lines, Atlanta, GA — Production Manager x SCADPRO** **September 2026 - Present**

**Deloitte, Atlanta, GA — UX/UI Designer & Product Designer Internship x SCADPRO** **March 2026 - May 2026**

• Collaborated with Deloitte to modernize a vaccine safety mobile-first application, conducting user research, surveys, and interviews with clinicians and pharmacists to uncover deep workflow patterns and pain points.
• Designed high-fidelity prototypes for three distinct personas — general public, clinicians, and caregivers — translating research insights into intuitive, accessible user flows that reduced cognitive load and friction.
• Performed competitive analysis of existing clinical health platforms, benchmarking interaction patterns and accessibility standards to inform persona-driven design decisions across all digital touchpoints of the application.

**Atom Advantage AI, Atlanta, GA — UX/UI Designer - Full-Time** **January 2026 - June 2026**

**UX/UI Designer - Redesign of ATOM Advantage's Website**

• Led end-to-end redesign and rebranding of Atom Advantage AI's website, crafting a visual brand language — color systems, typography, and components — that clearly communicates product value from first impression.
• Architected intuitive information hierarchy and user flows so visitors immediately understand the product, its features, and how each component works, reducing friction and accelerating customer comprehension at every scroll.
• Integrated SEO best practices and marketing-driven UX strategies alongside company, market, and competitor research to inform positioning, messaging, and a cohesive rebrand across the company's entire digital presence.

**UX/UI Designer - Internal Systems**

• **Modernized the UX/UI of a confidential internal workers' comp medical authorization platform**, redesigning document intake and classification workflows to reduce friction, improve task clarity, and support claims processors handling high volumes of daily records.
• **Restructured multi-step user flows** across AI-powered document extraction pipelines within internal systems, improving visual hierarchy, navigation patterns, and error reduction for workers' comp teams managing complex medical authorization requests.
• **Led end-to-end UX redesign** of a proprietary internal workers' comp tool, transforming a legacy interface into a clean, enterprise-grade experience tailored for operational teams processing structured medical data at scale.

**Porsche, Atlanta, GA — UX/UI - Industrial Design Internship (Project-Based) x SCADPRO** **March 2025 - May 2025**

• Conducted **user research**, **field studies**, and competitive benchmarking to identify key gaps in Porsche's digital ecosystem and opportunities to enhance the luxury driving experience.
• Designed and prototyped integrated **physical–digital concepts**—improving in-vehicle interaction, brand connectivity, and user engagement through refined **UI flows and spatial experience** elements.
• Collaborated on a multidisciplinary team to deliver polished presentations and research-backed solutions to Porsche stakeholders, aligning innovation with brand values and user needs.

**AIG Insurance, Atlanta, GA — UX/UI - Product Design Internship (Project-Based) x SCADPRO** **March 2025 - May 2025**

• Collaborated with AIG on a real-world SCADpro project, researching workplace trends and designing innovative **physical and digital solutions** that reflect Atlanta's culture and improve employee experiences.
• Designed **interactive prototypes in Figma**, developing features like a **Zen Wall** and **digital kiosks** that display local events, workspace bookings, and dynamic team introductions for AIG offices.
• Developed spatial concepts, including architectural elements and branded installations, ensuring physical environments foster collaboration, engagement, and seamless integration with **digital workplace** tools and systems.

**Find Me, Remote — UX/UI design - Part-Time** **January 2025 - May 2025**

• Developed personalized **portfolio templates in Figma** for various user groups—including engineers, YouTubers, and volunteers—to showcase unique professional identities and enhance usability.
• Contributed to the development of the platform's landing page, integrating animations and interactive elements to improve user engagement.
• Conducted user research and refined the platform's information architecture, enhancing the overall user experience and meeting business goals.

## Skills

**Software**
- Figma, Illustrator, Photoshop, InDesign, Spline, Rhino, Blender
- Responsive design, mobile/web design, accessibility
- Wireframes, design systems, high-fidelity mockups
- Usability testing, user flows, component libraries

**User Research & Strategy**
- Heuristic analysis, surveys, interviews, synthesis
- Persona creation, journey mapping, affinity diagrams
- Research-informed product strategy and design validation

**Certifications**
- Google UX Design Professional Certificate
- Certified Adobe Photoshop Professional
- Certified Adobe Illustrator Professional
- Find Me UX Internship Certificate

**Communication & Collaboration**
- Presentation and storytelling skills
- Cross-functional teamwork
